PROFILE SUMMARY

I am a dedicated software developer with 3 years of experience in building and scaling applications using Node.js, JavaScript, Laravel, and PHP. My focus on quality development and collaboration has allowed me to contribute effectively to projects and drive impactful business solutions. I am passionate about creating efficient, scalable applications that enhance user engagement and deliver real results.

WORK EXPERIENCE

2022 Jan - Present

Sensiple Software Solutions Pvt Ltd, Chennai.

- **Worked on a Laravel project from scratch**, gaining hands-on experience in **Express, MongoDB, Laravel, PHP, and MySQL**.
- **Led the development of key features for a CMS in Laravel**, overseeing the creation and integration of both **admin and user modules**.
- Enhanced expertise in **JavaScript, Node.js, Git, Google Cloud Platform (GCP), Dialogflow,** and **Agile methodologies**.
- Created **reusable packages and libraries**, enhancing efficiency and reusability across multiple projects.
- Conducted code reviews to ensure adherence to established **programming standards and best practices**.
- Collaborated with the SEO manager to design and implement website optimizations, resulting in a **40% increase in website traffic and a 25% decrease in bounce rate**.
- Gained **IVR development experience** through projects like **Astound RCN and REI**, contributing to robust and user-friendly solutions.
- **Worked directly with clients** to implement design changes and performed **code reviews for team members** to ensure quality and consistency.
- Participated in **hands-on training**, collaborating closely with supervisors and teammates, and actively engaging in **knowledge-sharing** to improve understanding and performance.

Projects and Achievements

Cloud Platform Project :

- Successfully completed a **cloud platform project using Laravel**, incorporating **SEO optimization tasks** to enhance platform visibility and performance.

IVR Project :

- Delivered successful **IVR solutions** for projects including **RCN, REI,** and **SVS**, showcasing expertise in **designing and implementing** robust interactive voice response systems.

Quiz Game Development :

- Developed **APIs** and the admin panel for an interactive quiz game, utilizing **Web Sockets** to seamlessly connect devices sharing the same IP.
- Employed technologies such as **Node.js, Express, MongoDB, Web Sockets, HTML, CSS,** and **Bootstrap** to create a highly engaging and responsive application.
